

## **QuikTRAY™ Rollout System**

The QuikTRAY™ Rollout System from **TENN-TEX** Plastics lets you add value to your entire product line. Equally useful with frame or frameless cabinets, QuikTRAY™ installs easily and adjusts without tools.

With QuikTRAY™ there's no need to change your current specifications in order to maximize storage space in new or existing cabinets. The versatility and simplicity of the system works with any standard cabinet and most brands of drawer slides.

New cabinets, existing cabinets, sales displays and pantry units can all benefit from the patented QuikTRAY™ Rollout System. It's **The Simple Solution** for maximizing storage space.

**TENN-TEX** Plastics Inc. has tested a variety of drawer slides on the market. Tested drawer slides include: epoxy-coated side-mount, ballbearing, metal-sided, and undermount. Each slide was tested with a 75-pound load at 100,000 cycles. We recommend a maximum of three rollouts per 20" long pilaster. No drawer should exceed a maximum load of 75 pounds. Please check your drawer-slide manufacturer's specifications for slide and test ratings. Do not exceed the manufacturer's specifications.

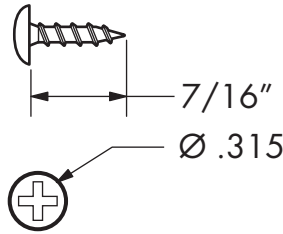

For concealed full-extension undermount slides, we recommend the use of T-508 hook dowels at the front and back.

When using epoxy-coated slides, we recommend double captive versions for best performance.
